

(a) DATA ORIGIN

shared by both generative arms

real93

93 annotated photographs

Examples from on-site inspection

Corpus also includes web-sourced real photographs.

C Photo reference

edit an existing scene

D LoRA training source

learn from the same 93

Shared origin; different synthesis

(b) C / IMAGE EDITING

complete: 1,085 reviewed images

Photograph + edit instruction

reference scene and target state

Qwen-Image-Edit-2509

Qwen 2.5 VL encoder + VAE

4-step Lightning LoRA mode

Sample and decode

edited scene candidate

Review image and boxes

1,085 retained for YOLO

Same scene; modified safety state

(c) D / LORA TEXT-TO-IMAGE

LoRA trained; dataset pending

real93 + training tags

Qwen tagging; threshold 0.30

Train Qwen-Image LoRA

2,000 steps | LR 4e-4 | rank 16

standard workflow; no crop

Qwen-Image-2.1 + LoRA

text prompt to candidate scene

Screen and annotate

target: 1,085 accepted images

New-scene coverage to be tested
