
Preferred candidate for detection data: step 1860 / strength 0.8

Three metrics give complementary evidence; no weighted composite score is used.

Step / strength	Role	CLIP-T	Usable	Very realistic
1860 / 0.8	**Preferred candidate**	**30.41**	**6/9**	**6/9**
1500 / 0.8	Highest CLIP-T	30.76	4/9	4/9
1860 / 0.2	Most training-usable	29.58	7/9	3/9
No LoRA	Baseline	28.99	6/9	1/9

vs 1500 / 0.8: -0.35 CLIP-T, +2 usable, +2 very realistic.
vs 1860 / 0.2: +0.83 CLIP-T, -1 usable, +3 very realistic.

Orange outline identifies the preferred candidate. Prompt compliance is reported in the supplement.
